Preface	1
Cover	
Research Reports	
SEED PROTEIN PRODUCTION OF SOME PISUM MUTANTS AND RECOMBINANTS.	
A. Abou-Salha	3
TENTATIVE DESCRIPTION OF THE <u>put</u> GENE WHICH CONDITIONS DARK	
PURPLE TESTA IN PEAS. M. Bland, D. L. Auld, M. .!. Dial, and	
J. C. Crock	5
THE EFFECT OF THE GENOTYPE ON IN VITRO ROOTING OF PEA SHOOTS.	
T. Cardi and E. Filippone	7
EFFECT OF YEAR AND SPACING ON COMBINING ABILITY IN PEA.	
L. Csizmadla	10
BRANCHING IN PISUM: EFFECT OF THE FLOWERING AND LENGTH GENES.	
R. S. Floyd and I. C. Murfet	12
PHOTO- AND THERMO-SUSCEPT[BLR CHLOROPHYLL MUTANTS OF PISUM	
SATIVUM. W. Gottschalk	16
FLOWERING OF FASCIATED RECOMBINANTS UNDER SHORT DAY PHYTOTRON	
CONDITIONS. W. Gottschalk	17
THE REACTION OF PISUM GENOTYPES TO EXTREME SHORT DAY CONDITIONS.	
W. Gottschalk	19
HEP 4, A HIGH YIELDING LEAFLESS STRAIN OF PEA. K. R. Gupta.	21
GEOGRAPHIC ORIGIN OF PEA SEEDBORNE MOSAIC VIRUS: AN HYPOTHESIS.	
R. 0. Hampton	22
LOCALIZATION OF NITRATE REDUCTION IN SOME PISUM GENOTYPES.	
E. S. Jensen	27
VARIATION IN NODULATION CAPACITY OF PEA VARIETIES. F. H. Jensen	30
ARTIFICIAL POLYPLIDS OF THE PEA. G. Kasperek	32
ADDITIONAL MUTANTS DEFECTIVE IN NODULATION. B.E. Kneen and T.A. LaRue	33

A NEW INTERPRETATION OF HAMMARLUND'S K-LINE. R. Lamm	34
LATERAL ROOT INITIATION IN RHIZOBIUM INOCULATED PEA SEEDLINGS. W. J. M. Lommen	37
LOCATION OF er PROVING ELUSIVE. G. A. Marx	39
LINKAGE OF AN AEROMACULATA MUTANT ON CHROMOSOME 1. G. A. Marx	42
LINKAGE RELATIONS OF <u>Curl</u> , <u>Orc</u> , AND " <u>Det</u> " WITH MARKERS ON CHROMOSOME 7. G. A. Marx	45
TENDRILLED ACACIA (tac): AN ALLELE AT THE uni LOCUS. G. A. Marx	49
QUANTITATIVE EVALUATION OF ENZYME ACTIVITIES IN SEEDS FROM FIELD- AND PHYTOTRON-CULTIVATED PLANTS. H.P. Muller	53
AN ALLOZYMIC POLYMORPHISM IN PEA MALATE DEHYDROGENASE IS SPECIFIED BY A LOCUS ON CHROMOSOME 1. E. Pagowska and N. F. Weeden	54
A GENERAL DESCRIPTION OF POD DEVELOPMENT IN PISUM SATIVUM. D. N. Price and I. E. Hayward	56
EFFECT OF GIBBERELLIN TREATMENT ON THE EXPRESSIVITY OF MUTANT GENES IN HOMO- AND HETEROZYGOUS CONDITION. K. K. Sidorova	59
THE IDENTIFICATION OF PISUM CHROMOSOME 7 IN THE INTERPHASE NUCLEUS. G. Wolff	61
TWO INTERCHANGE LINES OF PISUM SATIVUM 'DIPPES GELBE VIKTORIA' (DGV) STUDIED BY MEANS OF THE C-BANDING TECHNIQUE. G. Wolff	64
Commentary	
GENERAL CONSIDERATIONS FOR THE USE OF PEA GENOTYPES FOR MODELS OF PLANT MORPHOGENESIS. H. W. Ingensiep	67
Stocks Available	69
Supplementary Linkage Data. G.A. Marx	70
Directory of Members	71
