

PISUM GENETICS

Volume 38

2006

College of Agriculture, Montana State University, Bozeman, Montana

ISSN 1320-2510

Cover: Several new morphological mutations are described in this volume. The one pictured on the cover is one of five described by S.M. Rozov and involves a change affecting tendrils, leaflets and internodes. Other mutations characterized include a new allele at *Tl*, a fasciation mutant, one producing necrotic lesions and one changing tendril branching architecture.
