

Pisum Genetics Association Notes

The Pisum Genetics Association (PGA) is a non-profit, unincorporated organization established to foster genetic study of the pea, to facilitate the exchange of information and to ensure preservation of valuable genetic stocks. The journal, **Pisum Genetics**, is the principal means of meeting these aims. Published annually in one issue, Pisum Genetics contains reports of research findings and other information of interest to researchers studying the genus *Pisum*.

Membership and Dues

Membership in the PGA is open to all interested persons and organizations. Dues are US \$15.00 per year. These dues are used to help defray the costs of publishing and mailing Pisum Genetics. Members are requested to send checks or bank drafts in US currency only. Such efforts avoid bank charges, which can exceed \$10.00 per check in some currencies. Please make checks payable to Pisum Genetics Association and send to Kevin McPhee, NDSU Dept 7670, P.O. Box 6050, 370G Loftsgard, Fargo, ND, USA, kevin.mcphee@ndsu.edu. Pisum Genetics will be sent upon receipt of dues.

All members of the PGA are welcome to submit manuscripts on topics appropriate for Pisum Genetics. The deadline for such submittals is usually September 1 of the year of publication, allowing for sufficient time for review and revision of manuscripts. The journal provides opportunities for both refereed and non-refereed manuscripts, publication is within 3 to 6 months of submittal, and there are no page charges. Pisum Genetics is indexed in CAB International. As has been the case for the last decade, a web-based version is available shortly after publication of the hard copy (<http://hermes.bionet.nsc.ru/pg/>).

Submission of Manuscripts

When submitting an electronic copy of a manuscript, please use Microsoft Word when possible. Other formats can be handled, but these will usually be converted to Word for processing. It is also helpful if authors avoid the use of extra formatting in their submissions (headers, sections, automatic indentation) as these generally have to be eliminated when preparing the manuscript for final printing. Tables created in Word using the table function are most likely to survive the formatting process intact. We have severe limitations on support staff, and the removal of interfering formatting can occasionally be quite time-consuming. Graphics reproduce best at 300 dpi.

Format of Manuscripts

Manuscripts are generally separated into two types, research papers and brief communications. Manuscripts submitted as research papers will be subjected to peer review. Research papers should be written concisely, with a short introduction presenting the purpose for the study, a materials and methods section with essential details and references to techniques, a results section and discussion section interpreting the results and integrating findings with those of other workers. Section headings are not obligatory. The length of manuscripts is flexible. Manuscripts under five journal pages are encouraged. Longer papers will be considered on their merits and space availability in the volume. All research papers must be treated similarly to submissions to other refereed journals in that they should contain original work not currently submitted to any other journal.

**Brief
Communications**

Brief communications are to encourage a rapid sharing of new results that may not meet the standards of a research paper (i.e. allelism tests not completed, map locations only approximate). Brief communications can also be used to describe the availability of new germplasm. Brief communications will not be subjected to peer review although the editor reserves the right to screen papers for appropriateness and to review submissions for clarity and brevity. such submissions will be limited to approximately one page and should be narrowly focused. Otherwise, the format of brief communications (tables, references, etc.) should correspond to that of a research paper. Publication of a brief communication in Pisum Genetics does not preclude publication of a full paper on the same subject in a later issue or in another journal.

Member News

(<http://hermes.bionet.nsc.ru/pg/>) and has extended the coverage of previous issues available on the site back to volume 11 (1979). Electronic versions of volumes 9 and 10 are expected to be available on this site shortly. Hard copies of volumes 10 through 43, plus a selected number of earlier volumes can be obtained by contacting the editorial office.

The PGA continues to be fiscally healthy. income from dues and subscriptions

Financial Report

has been adequate to cover expenditures. We have adequate funds in savings/certificate of deposit accounts that can cover most PGA expenses for several years. The financial accounts were transferred to Fargo, North Dakota, in late 2008 and are expected to be maintained there for the foreseeable future. The financial report is based on the current status of funds in Fargo, North Dakota. An accounting error was recognized in 2011 and a corrected financial statement for 2010 is included in Volume 43. Expenditures for distribution of Volume 42 and publication and distribution of Volume 43 are not included in this report.

Financial Report for Volume 43

Account balances from preceding year		
Checking (Nov. 2010)	658.41	
Savings/Certificate of Deposit	6502.45	
Total assets		7160.86
 Income		
Subscriptions	345.00	
Bank interest	5.96	
Total income		350.96
 Expenditures		
Printing costs (volume 42)	602.89	
Total expenditures		(602.89)
 Account balances		
Savings/CD (Oct. 2011)	6508.41	
Checking (Sept. 2011)	400.52	
Net balance for Pisum Genetics Association		6908.93
